

35. (5) Quicker Approach

Speed of the boat in still water

$$= \frac{1}{2} (\text{Rate down stream} + \text{Rate upstream})$$

$$= \frac{1}{2} (32 + 28) = 30 \text{ kmph}$$

36. (4) The series is based on the following pattern :

$$11 = 2 \times 3 + 5$$

$$38 = 11 \times 4 - 6$$

$$197 = 38 \times 5 + 7$$

$$1172 \neq 197 \times 6 - 8$$

∴ 1172 is wrong and it should be replaced by

$$197 \times 6 - 8 = 1174$$

37. (1) The series is based on the following pattern :

$$107 - 71 = 36 = 6^2$$

$$71 - 46 = 25 = 5^2$$

$$46 - 30 = 16 = 4^2$$

$$30 - 21 = 9 = 3^2$$

$$21 - 19 = 2 \neq 2^2$$

∴ 19 should be replaced by 17 for which $21 - 17 = 2^2$

38. (4) The series is based on the following pattern :

$$16 = 9 + 7$$

$$25 = 16 + 9$$

$$41 = 16 + 25$$

$$68 \neq 25 + 41$$

39. (3) The series is based on the following pattern:

Obviously, 3.5 is the wrong number which should be replaced by 3.

40. (2) The series is based on the following pattern:

Obviously, 1.75 is the wrong number which should be replaced by 1.5.

41 – 45. Number of female players = 200

Number of male players = 600

$$\text{Total number of cricketers} = 800 \times \frac{1}{4} = 200$$

Female cricketers = 60

Male cricketers = 140

Male badminton players = $110 - 30 = 80$

Total tennis players = 80

Total hockey players = 220

Female tennis players = 22

Male tennis players = $80 - 22 = 58$

Total baseball players = 190

Female baseball players = 44

Female hockey players = 44

Male hockey players = $220 - 44 = 176$

Male baseball players = 146

41. (2) Required ratio = $44 : 80 = 11 : 20$

42. (3) Total number of males in hockey, cricket and baseball = $176 + 140 + 146 = 462$

43. (1) Required percentage = $\frac{44}{176} \times 100 = 25$

44. (5) Required difference = $146 - 80 = 66$

45. (4) There are maximum female players in cricket (60) and minimum male players in tennis (58).

46. (1) Required average monthly salary = $\frac{15000 + 15000 + 30000}{3} = \text{Rs. } 20000$

47. (2) Total monthly salary of all the five persons in 2008 = Rs. 75 thousand

Arvind's total monthly salary = Rs. 45 thousand

Required percentage = $\frac{45}{75} \times 100 = 60\%$

48. (4) Earning of each one over all the years :

Sumit = Rs. 60 thousand

Anil = Rs. 40 thousand

Jyoti = Rs. 75 thousand

Arvind = Rs. 45 thousand

Poonam = Rs. 60 thousand

49. (3) Required percentage

$$= \frac{25 - 20}{25} \times 100 = 20\%$$

50. (2) After an increase of 30% Jyoti's salary in 2010

$$= \frac{30 \times 130}{100} = \text{Rs. } 39 \text{ thousand}$$

51. (5) I. $\Rightarrow p^2 + 3p + 2p + 6 = 0$

$$\Rightarrow (p + 3) + 2(p + 3) = 0$$

$$\Rightarrow (p + 3)(p + 2) = 0$$

$$\Rightarrow p = -2 \text{ or } -3$$

II $\Rightarrow q^2 + q + 2q + 2 = 0$

$$\Rightarrow q(q + 1) + 2(q + 1) = 0$$

$$\Rightarrow (q + 1)(q + 2) = 0$$

$$\Rightarrow q = -1 \text{ or } -2$$

Obviously $p \leq q$

52. (4) I. $\Rightarrow p = \pm 2$

II. $\Rightarrow q^2 + 2q + 2q + 4 = 0$

$$\Rightarrow q(q + 2) + 2(q + 2) = 0$$

$$\Rightarrow (q + 2)(q + 2) = 0$$

$$\Rightarrow q = -2$$

Obviously, $p \geq q$

53. (2) I. $\Rightarrow p^2 + p - 56 = 0$

$$\Rightarrow p^2 + 8p - 7p - 56 = 0$$

$$\Rightarrow p(p + 8) - 7(p + 8) = 0$$

$$\Rightarrow (p + 8)(p - 7) = 0$$

$$\Rightarrow p = 7 \text{ or } -8$$

II. $\Rightarrow q^2 - 8q - 9q + 72 = 0$

$$\Rightarrow q(q - 8) - 9(q - 8) = 0$$

$$\Rightarrow (q - 8)(q - 9) = 0$$

$$\Rightarrow q = 8 \text{ or } 9$$

Obviously, $p < q$

54. (1) We have,

$$3p + 2q = 58 \quad \dots(i)$$

$$4p + 4q = 92 \quad \dots(ii)$$

$$\Rightarrow 2p + 2q = 46 \quad \dots(iii)$$

By (i) - (ii) we get
 $p = 12$

From (i), $3 \times 12 + 2q = 58$
 $\Rightarrow 2q = 58 - 36 = 22$
 $\Rightarrow q = 11$

Hence, $p > q$

55. (2) I. $\Rightarrow 3p^2 + 15p + 2p + 10 = 0$
 $\Rightarrow 3p(p + 5) + 2(p + 5) = 0$
 $\Rightarrow (p + 5)(3p + 2) = 0$
 $\Rightarrow p = -5$ or $-\frac{2}{3}$

II. $\Rightarrow 10q^2 + 5q + 4q + 2 = 0$
 $\Rightarrow 5q(2q + 1) + 2(2q + 1) = 0$
 $\Rightarrow (2q + 1)(5q + 2) = 0$
 $\Rightarrow q = -\frac{1}{2}$ or $-\frac{2}{5}$

Obviously, $p < q$

56. (5) Let the breadth of rectangular field be x metres.

\therefore Length = $x \times \frac{115}{100} = \frac{23x}{20}$ metres

Now, Length \times Breadth = Area

$\Rightarrow \frac{23x}{20} \times x = 460$

$\Rightarrow x^2 = \frac{460 \times 20}{23}$

$\Rightarrow x^2 = 20 \times 20$

$\Rightarrow x = \sqrt{20 \times 20} = 20$ metres

57. (1) Let the listed price be Rs. x .

\therefore Discount = 30% of $x = \frac{30x}{100} = \text{Rs. } \frac{3x}{10}$

According to the question,

$\frac{3x}{10} = 82.5 \Rightarrow x = \frac{82.5 \times 10}{3} = \text{Rs. } 275$

\therefore Required cost price of calculator = 70% of 275

= Rs. $\frac{70 \times 275}{100} = \text{Rs. } 192.50$

58. (5) There are 8 letters in the word 'SOFTWARE', including 3 vowels (O, A, E) and 5 consonants (S, F, T, W, R).

Considering three vowels as one letter, we have six letters which can be arranged in ${}^6P_6 = 6!$ ways. But corresponding to each way of these arrangements, the vowels can be put together in 3! ways.

\therefore Required number of words = $6! \times 3! = 4320$

59. (1) 4 men out of 7 men and 4 women out of 8 women can be chosen in ${}^7C_4 \times {}^8C_4$ ways

$\Rightarrow \frac{7 \times 6 \times 5 \times 4}{1 \times 2 \times 3 \times 4} \times \frac{8 \times 7 \times 6 \times 5}{1 \times 2 \times 3 \times 4} = 35 \times 70 = 2450$

60. (4) Let the principal be Rs. x and rate of interest be $r\%$

Case I: $\frac{x \times r \times 7}{100} = 1750$

$\Rightarrow xr = \frac{1750 \times 100}{7} = \text{Rs. } 25000$

Case II :

S. I. = $\frac{x \times (r + 2) \times 7}{100}$

Which cannot be determined with the help of given information.

61. (3) A's present age = $2x$ years

B's present age = $3x$ years

According to the question,

$3x + 16 = 2(2x + 4)$

$\Rightarrow 3x + 16 = 4x + 8$

$\Rightarrow 4x - 3x = 16 - 8$

$\Rightarrow x = 8$ years

= Required difference

62. (5) C.I. = $P \left[\left(1 + \frac{R}{100} \right)^T - 1 \right]$

S.I. = $\frac{P \times R \times T}{100}$

According to the question,

$2P \left[\left(1 + \frac{10}{100} \right)^2 - 1 \right] = \frac{Px \times 3}{100}$

$\Rightarrow 2 \left[\left(1 + \frac{1}{10} \right)^2 - 1 \right] = \frac{3x}{100}$

$\Rightarrow 2 \left[\left(\frac{11}{10} \right)^2 - 1 \right] = \frac{3x}{100}$

$\Rightarrow 2 \left(\frac{121}{100} - 1 \right) = \frac{3x}{100}$

$\Rightarrow \frac{2 \times 21}{100} = \frac{3x}{100}$

$\Rightarrow 3x = 2 \times 21$

$\Rightarrow x = \frac{2 \times 21}{3} = 7 \times 2 = 14$

63. (2) Total possible outcomes = $n(S)$

Selection of 4 marbles out of 15 marbles.

${}^{15}C_4 = \frac{15 \times 14 \times 13 \times 12}{1 \times 2 \times 3 \times 4} = 1365$

When no marble is blue, favourable number of cases

$n(E)$ = Selection of 4 marbles out of 11 marbles

${}^{11}C_4 = \frac{11 \times 10 \times 9 \times 8}{1 \times 2 \times 3 \times 4} = 330$

\therefore Required probability = $1 - \frac{n(E)}{n(S)}$

= $1 - \frac{330}{1365} = 1 - \frac{22}{91} = \frac{69}{91}$

64. (5) Total possible outcomes = $n(S)$

${}^{15}C_2 = \frac{15 \times 14}{1 \times 2} = 105$

Favourable number of cases = $n(E)$ = Selection of 2 marbles out of 6 red marbles

$${}^6C_2 = \frac{6 \times 5}{1 \times 2} = 15$$

$$\therefore \text{Required probability} = \frac{n(E)}{n(S)} = \frac{15}{105} = \frac{1}{7}$$

65. (3) Total possible outcomes = n(S)

$${}^{15}C_3 = \frac{15 \times 14 \times 13}{1 \times 2 \times 3} = 455$$

Favourable number of cases = n(E) = ${}^4C_2 \times {}^3C_1$

$$= \frac{4 \times 3}{1 \times 2} \times 3 = 18$$

$$\text{Required probability} = \frac{18}{455}$$

(66 – 67):

66. (1) Mohan is grandson of Reva.
67. (3) Neela is sister of Vikash. Therefore, Vikash's wife is sister-in-law of Neela.

68 - 69.

- (i) $P @ Q \Rightarrow P < Q$
Therefore, $P > Q$ or $P = Q$
Thus, $P \geq Q$
(ii) $P \# Q \Rightarrow P > Q$ and $P \neq Q$
Therefore, $P < Q$
(iii) $P \$ Q \Rightarrow P < Q$ and $P > Q$
Therefore, $P = Q$
(iv) $P \star Q \Rightarrow P > Q$
Therefore, $P < Q$ and $P = Q$
Thus, $P \leq Q$
(v) $P \% Q \Rightarrow P < Q$ and $P \neq Q$
Therefore, $P > Q$

@ \Rightarrow \geq	# \Rightarrow $<$
\$ \Rightarrow $=$	* \Rightarrow \leq
% \Rightarrow $>$	

68. (3) **Statements**

- $M \$ K \Rightarrow M = K$
 $D * K \Rightarrow D \leq K$
 $R \# K \Rightarrow R < K$
Therefore,
 $R < M = K \geq D$

Conclusions

- I. $D \$ M \Rightarrow D = M$: Not True
II. $M \% D \Rightarrow M > D$: Not True
D is either smaller than or equal to M. Therefore, either Conclusion I or II is true.

69. (4) **Statements**

- $F * M \Rightarrow F \leq M$
 $M \% R \Rightarrow M > R$
 $F @ F \Rightarrow E \geq F$

Therefore, $F \geq F \leq M > R$

Conclusions

- I. $M \% E \Rightarrow M > E$: Not True
II. $R @ E \Rightarrow R \geq E$: Not True

70 – 72.

70. (5) black \Rightarrow town; 'pink' may be code for 'risk'.
yellow \Rightarrow in
71. (2) attack \Rightarrow indigo
72. (1) hidden \Rightarrow white;
weapons \Rightarrow red
'orange' may be code for 'all'.
73. (4) None of the courses of action is suitable for pursuing. If the company Lixus would not manufacture Ball point pens, some other company may introduce Ball point pens in the market. Similarly, some other company may introduce gel-ink pens in the market.
74. (4) As the recession is world-wide employment scenario in other countries would also have adversely affected. Therefore, course of action I is not suitable for pursuing. Course of action II lacks practical approach.
75. (4) None of the courses of action is suitable for pursuing.

76 – 80.

76. (4) P and D sit at extreme ends of the rows.
77. (2) Two persons - S and T - are seating between V and R.
78. (2) P faces the person who sits second to the left of A. S faces the person who sits second to the left of B. Similarly, T faces E who sits second to the left of D.
79. (3) F faces V who sits second to the right of T.
80. (5) A faces the immediate neighbour of T. B faces the immediate neighbour of T. F faces the immediate neighbour of P. C faces the immediate neighbour of V. But E faces the person who is second to the right of Q.

(81 – 85): Sitting arrangement

81. (3) A and E are facing opposite to the centre.
82. (4) B is sitting second to the left of A.

Grand Test – NIACL/DCCB-190107

- 83. (2) G is sitting to the immediate left of E.
- 84. (5) F is third to the left of B.
- 85. (3)

- I. ✓
- II. ✓
- Both (I) and (II) follows.

- 86. (2) Statement B
- 87. (3) Statement E
- 88. (1) Statement A
- 89. (5) Statements B and D
- 90. (1) Option (1) is an assumption.
- 91. (2) Only assumption II is implicit in the statement.
- 92. (2) Only Inference II follows from the statement.
- 93. (2) Only assumption II is implicit in the statement.
- 94. (1) Only assumption I is implicit in the statement.
- 95. (4) The use of term 'always' in assumption I makes it invalid.
- 96-97.
